CARMIGNAC: A DECISIVE UNCONSTRAINED APPROACH IN LIGHT OF THE RISKS POSED BY THE END OF MASSIVE LIQUIDITY INJECTIONS

Carmignac's bond management team considers that the normalisation of monetary policies is now inevitable. This unwinding is bound to have an impact on bond markets, for which it is impossible to predict the results of this unprecedented experiment.

It is therefore more vital than ever to adopt an unconstrained, non-benchmarked bond management philosophy based on strong long-term convictions and with a flexible allocation in order to optimise risk management – the cornerstone of Carmignac's management style for over 25 years. This flexibility releases the manager from the benchmark index and allows one asset class to be favoured over another where necessary. This approach also incorporates a bottom-up dimension to generate performance, with a team of experienced analysts who work to extract value from credit, emerging and currency markets, volatility and the rates curve.

To best reflect this investment philosophy, Carmignac Portfolio Global Bond is changing its name to **Carmignac Portfolio Unconstrained Global Bond**.

Charles Zerah, who has managed this international bond fund since he joined Carmignac in 2010, says: *"The fund's performance is based on three main performance drivers: government debt, with the option of diversifying into emerging markets sovereign debt; private issuers, without any sectoral constraints, mainly developed countries with a few emerging ones; and currencies. A global investment universe combined with a flexible approach enables us to actively identify returns outside a financially repressed Europe and to implement strategies designed to benefit from a rise in interest rates."*

The 12-strong fixed income team is led by **Rose Ouahba**: *"Our bond management team has expanded in the last two years to tackle new market challenges. In particular, we have recruited five analysts who create value across all asset classes (rates curves, emerging debt, structured credit, high-yield corporate credit) to boost the performance of all our funds and particularly the **Carmignac Portfolio Unconstrained Global Bond** fund."*

About Carmignac

Founded in 1989 by Edouard Carmignac, the Carmignac Group is now one of Europe's leading asset managers. Its capital is held entirely by managers and staff. In this way, the company's long-term viability is ensured via a stable shareholding structure, reflecting its spirit of independence. This fundamental value ensures the freedom required for successful long-term portfolio management. With over EUR 61 billion of assets under management (as of 30/06/2017), Carmignac has developed a compact range of funds covering all asset classes (equities, bonds and balanced) with the objective of providing investors with consistent returns and low volatility. As part of its international development, Carmignac operates in Luxembourg, Frankfurt, Milan, Madrid, London, Zurich and Miami. Its products are authorised for marketing to professionals in France, Germany, Switzerland, Italy, Luxembourg, Belgium, Austria, Spain, the Netherlands, Sweden, the United Kingdom, Ireland, Taiwan and Singapore.
